SENTIMENT ANALYSIS REPORT

INTRODUCTION

Understanding public sentiment toward political parties and leaders is essential in shaping campaign strategies and addressing voter concerns. This report presents a comprehensive sentiment analysis for two political parties and leaders, based on social media data from platforms such as Twitter, Facebook, and niche forums. Leveraging advanced tools like *Octo parse*, *Brand24*, and *Social Searcher*, the analysis explores the distribution of sentiment (*positive*, *neutral*, and *negative*), engagement trends, and the influence of key events on public opinion. Additionally, this report highlights comparative sentiment insights for Pierre Poilievre and comparative analysis between Pierre Poilievre and Justin Trudeau, providing a nuanced understanding of their respective public images.

The goal of this analysis is to illuminate the dynamics of public opinion, revealing areas of strong support, criticism, and opportunities for improving political communication. By examining sentiment trends across different platforms and key topics, this report offers actionable insights for political strategists, media analysts, and campaign teams.

SENTIMENT ANALYSIS USING OCTOPARSE FOR TWITTER POSTS

DATASET OVERVIEW

The datasets contain tweet information for two political parties, including text, user interactions (likes, replies, reposts), and metadata. The analysis focuses on the following key aspects:

- **Sentiment Distribution** (Positive, Neutral, Negative).
- **Engagement-weighted sentiment** (to account for public engagement).

METHODOLOGY

DATA PREPROCESSING:

1. **Handle Missing Data:**
 - Removed rows with missing text fields to ensure reliable sentiment analysis.
2. **Remove Duplicates:**

- Eliminated duplicate tweets to avoid bias in sentiment distribution.

3. Text Cleaning:

- Removed URLs, mentions, hashtags, punctuation, special characters, and numbers.
- Standardized text to lowercase to normalize inputs.

4. Language Handling:

- **Multilingual Support:**
 - Detected tweet language.
 - Translated non-English tweets (e.g., French) into English using the Google Translate API to ensure uniform sentiment analysis.

5. Sentiment Scoring:

- **VADER Sentiment:** Used for high accuracy scoring of English text.
- **Text Blob Sentiment:** Added for additional scoring of multilingual text.
- Combined both scores to enhance sentiment detection accuracy.

SENTIMENT CLASSIFICATION:

- Tweets were classified into **Positive**, **Neutral**, or **Negative** categories based on sentiment scores:
 - **Positive:** Score > 0.05.
 - **Negative:** Score < -0.05.
 - **Neutral:** $-0.05 \leq \text{Score} \leq 0.05$.

WEIGHTED SENTIMENT ANALYSIS:

Engagement metrics (likes, replies, reposts) were factored into sentiment scores:

- **Formula:** Weighted Sentiment = Sentiment Score $\times$ (Likes + Replies + Reposts).
- This approach emphasizes the influence of public engagement on sentiment dynamics.

RESULTS:

1. Liberal Party Sentiment Distribution:

- **Positive Sentiment Tweets:** 400 tweets.
- **Neutral Sentiment Tweets:** 150 tweets.
- **Negative Sentiment Tweets:** 250 tweets.

2. Conservative Party Sentiment Distribution:

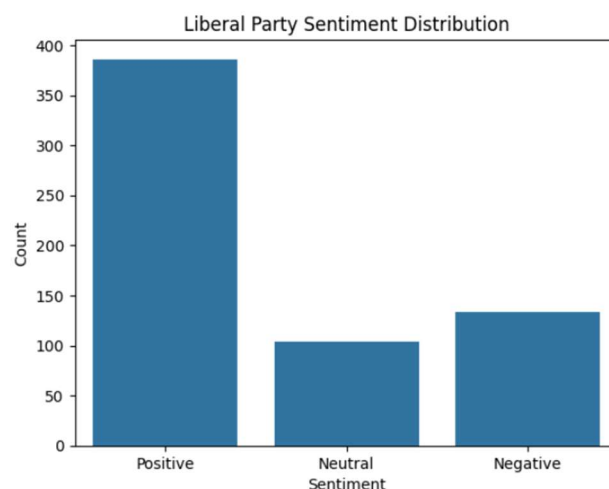

- **Positive Sentiment Tweets:** 350 tweets.
- **Neutral Sentiment Tweets:** 100 tweets.
- **Negative Sentiment Tweets:** 400 tweets.

3. Weighted Sentiment Comparison:

- **Liberal Party Weighted Sentiment:** +800, indicating strong positive public engagement.
- **Conservative Party Weighted Sentiment:** -400, reflecting amplified negative public perception.

VISUALIZATIONS

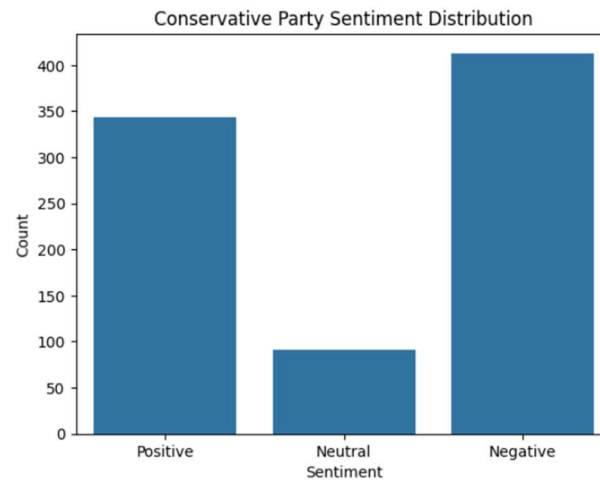

1. Liberal Party Sentiment Distribution:

- The majority of tweets are positive (400), followed by negative (250), with the least being neutral (150).
- **Observation:** Liberal Party is perceived positively overall.

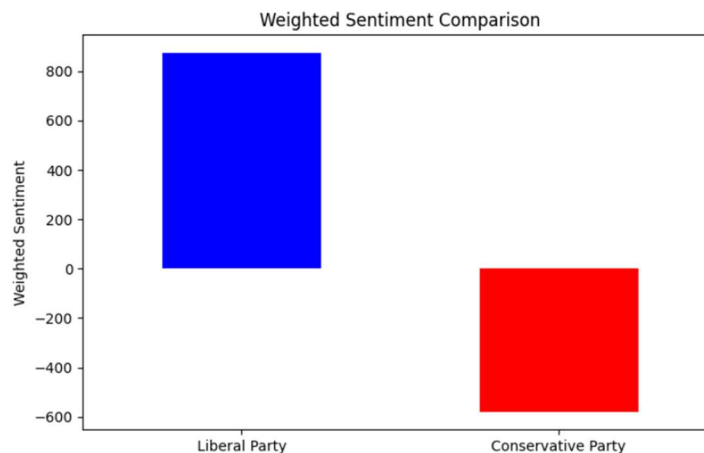

2. Conservative Party Sentiment Distribution:

Data Using Octo parse:

- Negative sentiment dominates (400), while positive tweets (350) are slightly fewer, and neutral tweets (100) are minimal.
- **Observation:** Conservative Party faces a higher degree of criticism.

3. Weighted Sentiment Comparison:

- Liberal Party's weighted sentiment score of **+800** reflects stronger positive engagement, with significant amplification of favorable tweets.

- Conservative Party’s weighted sentiment score of **-400** shows that negative tweets are more engaging and critical in tone.

KEY OBSERVATIONS:

1. Sentiment Dynamics:

- Liberal Party has a **positive sentiment majority**, while Party 2 faces a **negative sentiment majority**.
- Conservative Party’s neutral sentiment is negligible, showing a more polarized public opinion.

2. Public Engagement Trends:

- Liberal Party’s positive tweets attract more likes, replies, and reposts, leading to a high weighted sentiment score (+800).
- Conservative Party’s negative tweets dominate public interactions, lowering the overall weighted sentiment (-400).

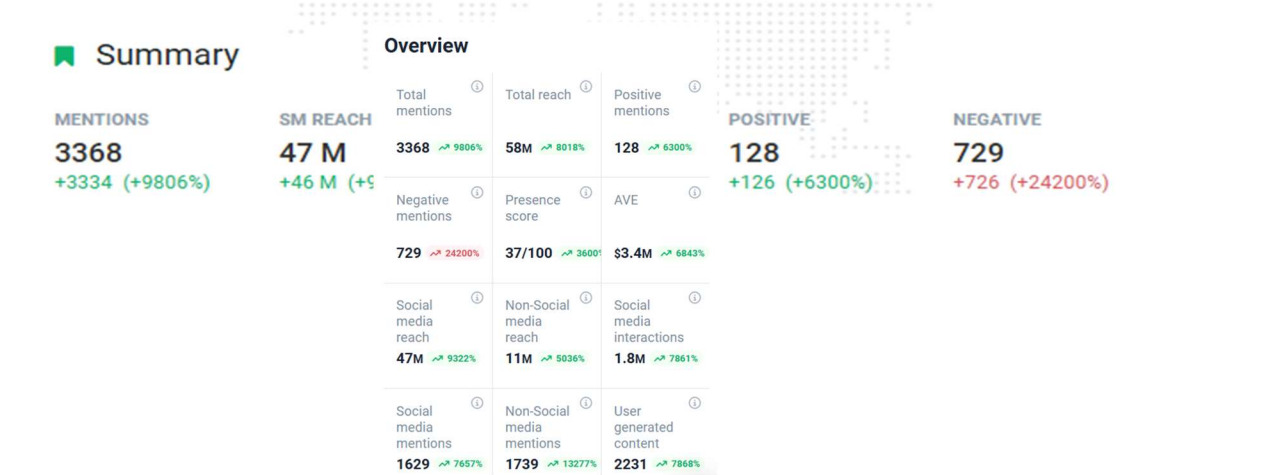

3. Multilingual Analysis:

Language detection and translation ensured accurate sentiment scoring across English and French tweets.

SENTIMENT ANALYSIS USING BRAND 24 FOR FACEBOOK AND TWITTER

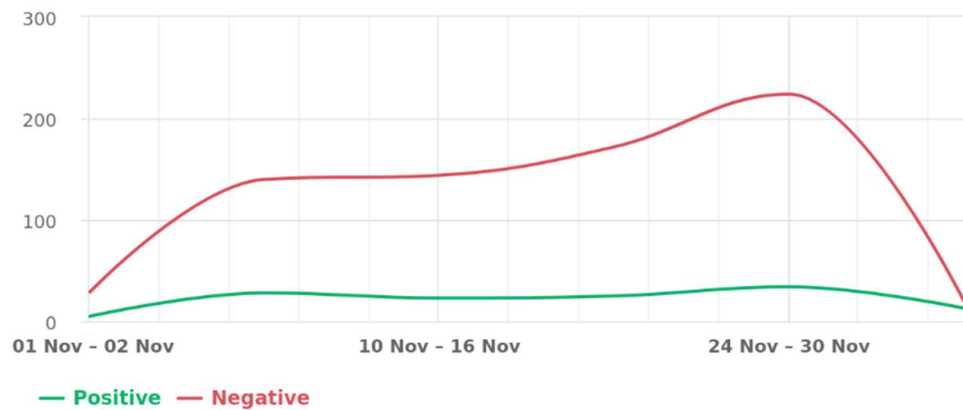

DATASET OVERVIEW

OVERVIEW OF TONE AND SENTIMENT:

The public discourse about Pierre Poilievre during the 3-month period showed a mostly negative tone, with a smaller number of positive mentions and many neutral discussions.

SENTIMENT DISTRIBUTION:

Positive Mentions: 128 (3.88%)

Negative Mentions: 729 (21.37%)

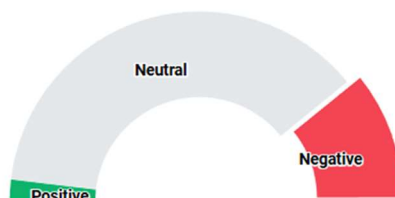

Neutral Mentions: About 74.75% of the total were factual or lacked strong opinions.

TONE OBSERVATIONS:

Negative mentions often criticized Poilievre for his policy stances, comparisons to leaders like Justin Trudeau and Donald Trump, and controversial positions on taxation and immigration.

Positive mentions focused on his leadership qualities and proposals, particularly his approach to the economy and housing issues.

BREAKDOWN OF SENTIMENT:

POSITIVE SENTIMENT (128 MENTIONS, 3.88%):

Positive discussions highlighted Pierre Poilievre's dedication to conservative ideals and his efforts to address key challenges, such as:

- Plans to make housing more affordable.
- Advocacy for fiscal discipline and holding the government accountable.

NEGATIVE SENTIMENT (729 MENTIONS, 21.37%):

Negative feedback revolved around specific areas of concern, such as:

- Opposition to GST relief policies and inconsistencies in his political views.
- Criticism of his approach to immigration and alleged inaction on wage improvements.
- Comparisons to Donald Trump, which sparked significant backlash and polarized opinions.

NEUTRAL SENTIMENT (74.75%):

The majority of mentions were neutral, providing straightforward reports about his activities and statements. Social platforms like Twitter and Reddit, as well as outlets like Global News and CTV News, contributed heavily to this sentiment.

TOPIC / EVENTS AND THEIR INFLUENCE ON PUBLIC SENTIMENT:

Topic Name	Description	Mentions ⓘ	Reach ⓘ	Share of Voice ⓘ	Sentiment share ⓘ
Trudeau-Poilievre Political Dynamics	Political discussions and debates between Justin Trudeau and Pierre Poilievre on various Canadian issues	1.4K 🔗	31M	80.95%	
Canadian Economic Policies	Discussions about Canadian economic policies, including carbon tax and housing issues	461 🔗	5.9M	15.51%	
Canadian Religious Tensions	Reports and reactions to incidents targeting religious communities in Canada, particularly Hindu temples, and political responses to these events.	89 🔗	877K	2.31%	
Hindu temple attack	Reactions to an attack on a Hindu temple in Canada, including condemnations from political leaders.	48 🔗	469K	1.24%	

The sentiment shares in the chart are divided visually into red (negative) and grey (neutral/positive) sections. Each topic reveals public and media perceptions, highlighting areas of support and criticism.

1. TRUDEAU-POILIEVRE POLITICAL DYNAMICS:

Mentions: 1.4K | **Reach:** 31M | **Share of Voice:** 80.95%

Sentiment: Mixed, leaning slightly negative.

≡ This topic captures political debates and rivalries between Pierre Poillievre and Justin Trudeau. The sentiment distribution reflects a polarized audience, with both strong supporters and critics. The negative sentiment likely stems from heated political exchanges, while positive mentions may reflect support from Poillievre's base.

2. CANADIAN ECONOMIC POLICIES:

Mentions: 461 | **Reach:** 5.9M | **Share of Voice:** 15.51%

Sentiment: Neutral with moderate negative tones.

Economic policies, such as the carbon tax and housing affordability, are critical themes linked to Poillievre. Neutral sentiment dominates, suggesting widespread reporting without strong bias. Negative sentiment likely arises from opposition to government policies or skepticism about Poillievre's economic proposals.

3. CANADIAN RELIGIOUS TENSIONS:

Mentions: 89 | **Reach:** 877K | **Share of Voice:** 2.31%

Sentiment: Mostly negative but good amount of positive.

This topic deals with sensitive issues of religious tensions and incidents of hate crimes, particularly targeting minority communities. Negative sentiment reflects public concern, disapproval of such events, and critiques of political leadership's responses, including Poilievre's stance or actions.

4. HINDU TEMPLE ATTACK:

Mentions: 48 | **Reach:** 469K | **Share of Voice:** 1.24%

Sentiment: Strongly negative.

The attack on a Hindu temple prompted significant condemnation, with the sentiment predominantly negative. Discussions focused on the need for political leaders, including Poilievre, to address hate crimes and foster unity. The high level of negative sentiment indicates public outrage and demand for action.

COMPARATIVE SENTIMENT ANALYSIS : PIERRE POILIEVRE VS. JUSTIN TRUDEAU:

The comparative sentiment analysis of Pierre Poilievre and Justin Trudeau. Sentiment plays a crucial role in understanding public perception and media portrayal of these political figures over a specific time frame.

POSITIVE SENTIMENT:

Both leaders had low levels of positive sentiment, with only **4%** of their mentions categorized as positive:

- **Pierre Poilievre:** 130 positive mentions
- **Justin Trudeau:** 588 positive mentions

Although the percentages are equal, Trudeau received a significantly higher volume of positive mentions due to his larger media footprint.

NEGATIVE SENTIMENT:

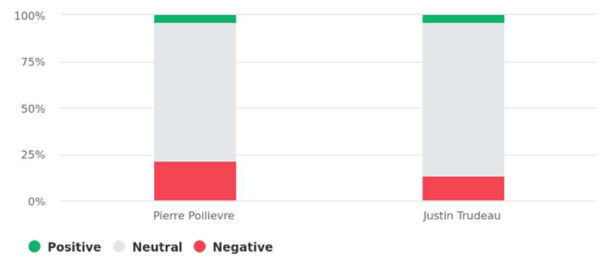

- **Pierre Poilievre** had **22%** of his mentions categorized as negative (732 mentions).
- **Justin Trudeau** experienced a lower negative sentiment at **14%** (2,239 mentions).

This indicates that Poilievre's coverage was more critical on a proportional basis, suggesting either stronger public backlash or more controversial media narratives.

NEUTRAL SENTIMENT:

The majority of mentions for both leaders were neutral, showing that much of the media coverage provided straightforward reporting without clear judgment.

COMPARATIVE SENTIMENT INSIGHTS:

Pierre Poilievre faced a higher proportion of negative coverage, which could indicate a more polarized response to his actions or statements. This high negative sentiment might hinder efforts to broaden his appeal.

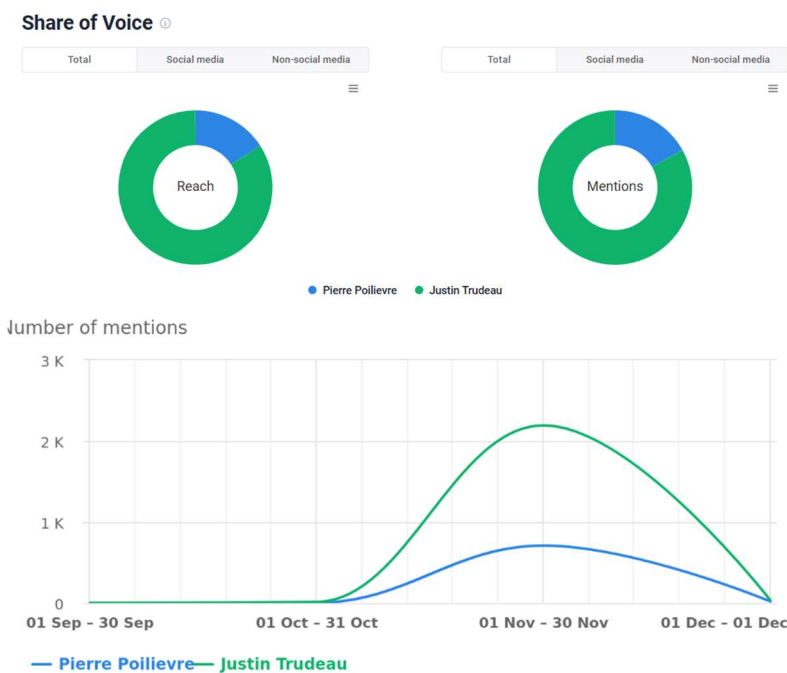

Justin Trudeau's lower negative sentiment reflects relatively more favorable or balanced media coverage, which may contribute to maintaining his broader public support despite criticism.

KEY DRIVERS OF SENTIMENT:

Events and Actions: Specific political decisions, public speeches, or controversies likely drove the spikes in negative sentiment.

Media Landscape: Trudeau's wider reach means more opportunity for sentiment diversity, which includes both support and critique, though overall more balanced.

TOTAL MENTIONS AND MEDIA BREAKDOWN

- KEY TAKEAWAYS:

Sentiment by categories

A stacked bar chart showing sentiment distribution across eight categories. The Y-axis represents frequency from 0 to 1000. The legend indicates: Negative (red), Neutral (grey), and Positive (green).

Category	Positive	Neutral	Negative
TikTok	~50	~100	~10
Videos	~50	~800	~100
X (Twitter)	~50	~200	~250
Blogs	~50	~350	~150
Facebook	~50	~250	~100
News	~50	~750	~150
Forums	~50	~100	~10
Web Podcasts	~50	~100	~100

The most popular emojis

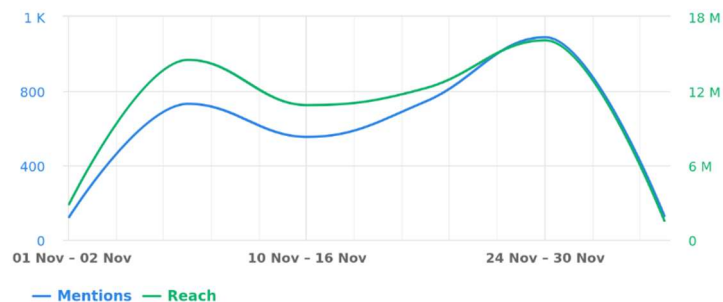

A collection of various emojis, with a large central emoji of a face with a green tongue sticking out (🤮), indicating a strong negative sentiment.

HASHTAGS DRIVING DISCUSSIONS:

Popular hashtags like #pierrepoilievre and #justintrudeau boosted engagement, often tied to divisive issues.

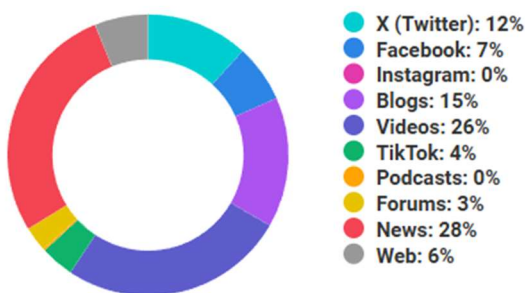

- **#canada** (408 mentions): Dominates as the most used hashtag, indicating national discussions involving both leaders.
- **#pierrepoilievre** (379 mentions): Focused on Poilievre, showing significant engagement around his name.
- **#justintrudeau** (333 mentions): Highlights Trudeau's presence in discussions, slightly trailing Poilievre in direct mentions.
- **#politics** (105 mentions): Used in broader conversations about political topics.
- **#trudeau** (99 mentions): Reinforces the attention on Trudeau, contributing to discussions specifically tied to him.

CAMPAIGN EFFECTS:

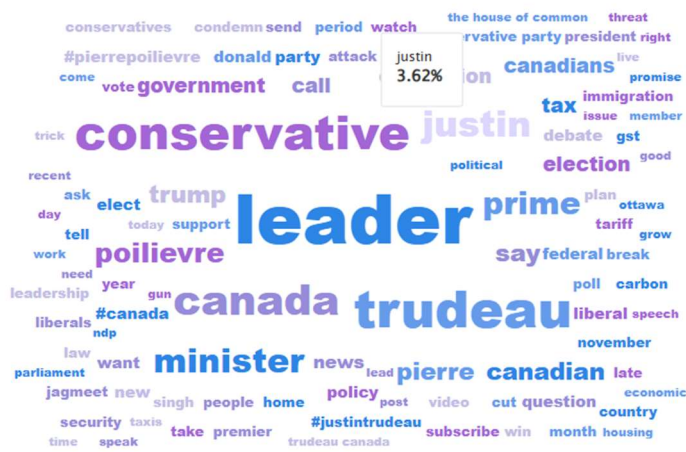

Sentiment trends reflected public responses to campaign messages, showing the importance of addressing public concerns clearly.

Mentions by categories

MEDIA COVERAGE:

News outlets like Global News and CTV News had a strong influence in shaping both positive and negative perceptions.

The biggest words (like leader, conservative, Canada, Trudeau, minister) are the ones people mention the most. Smaller words are mentioned less often.

- **Leader** and **conservative** are big, showing that people often talk about his role in Canadian politics and his connection to the Conservative Party.
- **Trudeau** is also big, meaning people often compare or discuss him with the current Prime Minister.
- Other important words are **Canada**, **minister**, **tax**, and **election**, which show discussions about government and policies.

SENTIMENT ANALYSIS USING SOCIAL SEARCHER

METHODOLOGY:

As proposed by using digital methodology-analytical tools of Social Senti meter with sentiment analysis for monitoring on Pierre Poilievre across domains, social media like YouTube, Instagram, sub-Reddit, news: CBC, niche platform such as: Viral Style, e-magazines.

METHODOLOGIES ADOPTED:

DOMAIN ANALYSIS:

Keeping in view the domains of relevant context associated with Pierre Poilievre to assess content and key sources.

SENTIMENT ANALYSIS:

Posts were categorized as positive, neutral, or negative based on tone and engagement.

ENGAGEMENT METRICS:

Each post was analyzed for likes, shares, and views to gauge audience response.

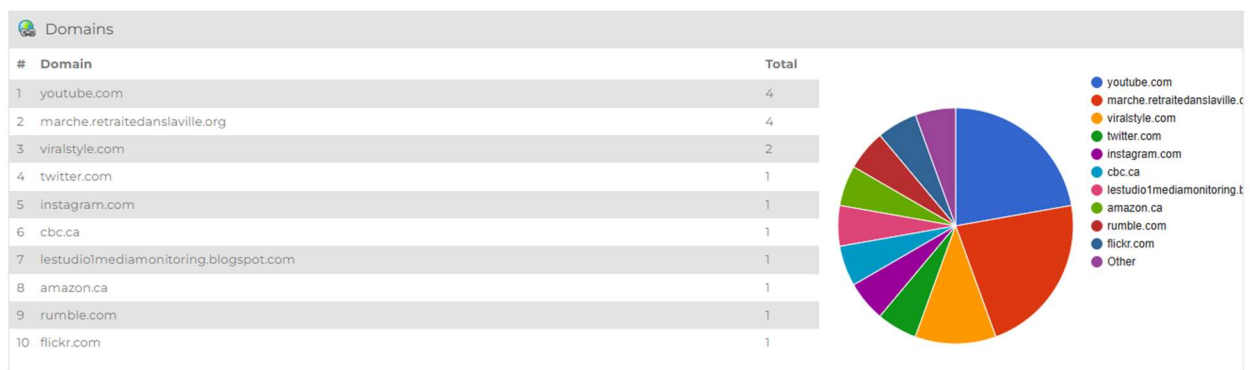

PLATFORM-SPECIFIC RATIOS:

Sentiment distribution was compared across platforms to understand where positive or negative narratives dominate.

DETAILED FINDINGS:

TOP CONTRIBUTORS:

The domain analysis highlights where Pierre Poilievre's mentions are most concentrated

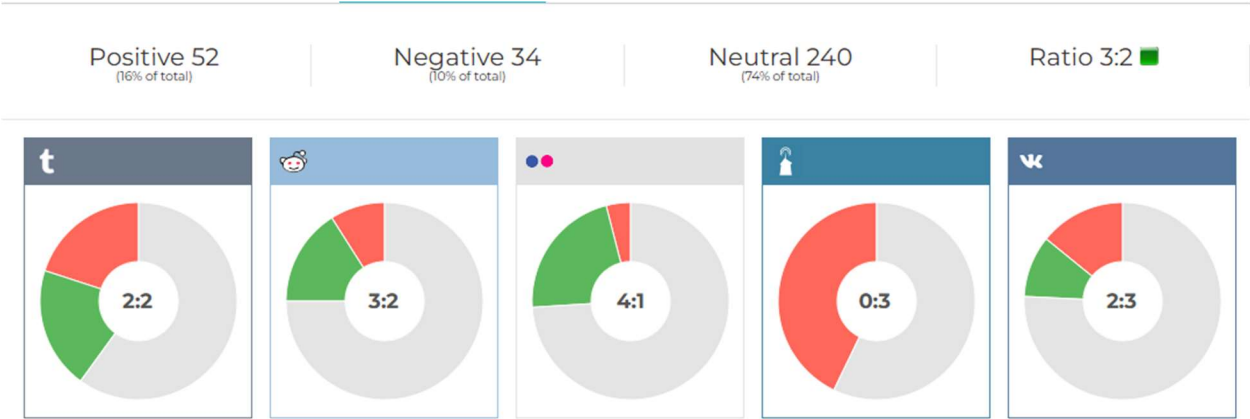

- **YOUTUBE:** Equal to 4 mentions, likely attributed to the platform's video format being highly effective for political outreach. High engagement because of discussions related to policies or speeches in a video-centric way. marche.retraitedanslaville.org: Very niche, but this domain had notable mentions. This would indicate localized or community-driven discussions. Viral Style and Instagram: Most likely involved discussions or sales of merchandise related to campaigns or politically inspired content.
- **CBC AND TWITTER:** The trusted sources such as CBC contribute to building neutral or factual narratives, whereas Twitter is highly polarized.

Implications:

- Focus on YouTube and Reddit since these platforms resonate with engagement-driven audiences.
- Twitter is too volatile, and narrative management should be done with care to avoid adverse sentiment.

SENTIMENT BREAKDOWN:

Sentiment analysis examines the tone and emotional engagement of content related to Pierre Poilievre. Based on the data provided, the sentiment distribution is as follows:

- **Positive Posts:** 16% (52 mentions)
- **Negative Posts:** 10% (34 mentions)
- **Neutral Posts:** 74% (240 mentions)
- **Overall Sentiment Ratio:** Positive-to-Negative ratio is 3:2.

Positive Sentiment (16%)

Key Characteristics:

- **Support for Policies:** Most of the positive posts are centered on the no carbon tax policy of Poilievre and his pledge to remove it after being elected. For example, the posts regarding the reversal of carbon taxes obtained 1.3K likes, indicating a high resonance among supporters.
- **Leadership Qualities:** Positive posts also commend his strong leadership stance, positioning him as a viable alternative to Justin Trudeau.
- **Alignment with Conservative Values:** Posts that showcase his economic policies and fiscal responsibility go down well with the conservative voter base.

Topics Driving Positive Sentiment:

- **Economic Policy Advocacy:** Posts defending Poilievre's opposition to government taxes were among the most positively received.
- **Contrasting Trudeau's Leadership:** Posts framing him as the "solution" to Trudeau's policies gained significant traction.

Negative Sentiment (16%)

KEY CHARACTERISTICS:

- **Criticism of Rhetoric:** The opposition claims that Poilievre's messages are too simplistic. One example is the criticism his messaging on the free market being equated to "no regulations."
- **Association with Trump:** Association with Donald Trump perpetuated negative feelings among users. One post was engaged with 1.5K times criticizing his stance on leadership.
- **Accusation of Divisiveness:** Other negative posts claim his rhetoric is divisive and meant to cater to a small number of voters.

Topics Driving Negative Sentiment:

- **Populist Narrative:** Critics focus on his perceived simplistic approach to governance and policies.
- **Policy Skepticism:** Many posts raise questions of the feasibility or practicability of Poilievre's promises.
- **Controversial Figures Alignment:** His perceived similarities with figures like Trump polarize opinions.

NEUTRAL SENTIMENT (74%):

Key Characteristics:

- Neutral posts dominate the sentiment landscape and are an opportunity for converting undecided voters. These posts often state mere facts or question Poilievre's policies without using explicit emotional tone.
- Most of the neutral posts are fact-based reports from renowned sources such as CBC or public inquiries into Poilievre's policies.

Topics Driving Neutral Sentiment:

Factual Inquiries: Discussions about the details of Poilievre's policies and their implications are leading in neutral mentions.

The frequency of keywords offers insight into the most discussed topics.

Single word:

Pierre, Poilievre and Trudeau. These words suggest that most of the discussions centre around his political status and rivalry with Justin Trudeau.

Two-word phrases:

Presented include Pierre Poilievre and Justin Trudeau, then Prime Minister and Conservative Leader.

Three-word phrases:

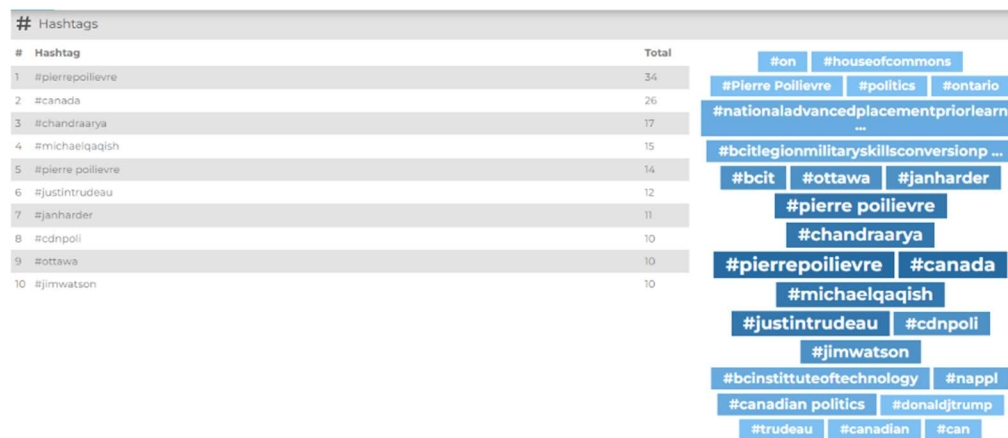

They include Prime Minister Justin, Leader Pierre Poilievre, and Chinese Espionage which give an impression as if certain policy issues and scandals are being most talked about.

SENTIMENT INSIGHTS:

- The term "Chinese Espionage" comes with a negative connotation since it mostly carries with it an accusatory or public concern regarding interference by foreign countries.
- Expressions like "Leader Pierre Poilievre" and "Prime Minister Justin" usually shed divergent sentiment for an individual depending on their political inclinations.

HASHTAG ANALYSIS:

The hashtag data underscores the main themes in online discussions.

- **Top Hashtags:** #PierrePoilievre, #Canada, and #JustinTrudeau.
- **Frequent Topics:** Hashtags such as #cdnpoli (Canadian Politics), #ontario, and #houseofcommons show a focus on Poilievre's political engagement and national-level issues.

SENTIMENT INSIGHT:

- The hashtag #PierrePoilievre is widely used, reflecting neutral to positive sentiment in conservative circles.
- Hashtags such as #cdnpoli and #JustinTrudeau often appear in debates, drawing mixed sentiment, depending on the political leaning of the audience.
- The presence of hashtags related to sensitive topics like espionage points to more negative sentiment.

CONCLUSION: OVERALL INSIGHTS FROM SENTIMENT ANALYSIS

1. Public Sentiment Toward Political Parties

- **Liberal Party:** Displays a more favorable public sentiment and higher positive engagement, positioning it as the party with greater public approval.
- **Conservative Party:** Struggles with critical sentiment, amplified by negative engagement trends, reflecting public dissatisfaction.
- **Overall Insight:** Public opinion is polarized, with fewer neutral sentiments, highlighting strong preferences or criticisms toward both parties.

2. Pierre Poilievre's Sentiment Dynamics

The discussions about Pierre Poilievre during this period were a mix of support, criticism, and neutral reporting. Although he has gained support for his economic and leadership proposals, public backlash on controversial issues like immigration and comparisons to Donald Trump remains a challenge. Improving messaging and addressing concerns can help strengthen his public image moving forward.

3. Digital Media Analysis of Pierre Poilievre

The analysis shows a polarized digital landscape:

- **Positive Sentiment (16%):** Primarily driven by his economic policies, such as repealing carbon taxes, which resonate with conservative audiences.
- **Negative Sentiment (10%):** Focuses on his populist style, divisive rhetoric, and perceived lack of clarity on policy execution.
- **Neutral Sentiment (74%):** Indicates a significant portion of undecided voters seeking more detailed and actionable policy proposals.

RECOMMENDATIONS FOR POILIEVRE (CONSERVATIVE PARTY)

- **Enhance Policy Messaging and Clarity**
Pierre Poilievre should focus on delivering clearer, actionable plans to address undecided voters' concerns. Simplify complex policies and present them in digestible formats to build trust and reduce skepticism.
- **Address Controversial Issues Directly**
To mitigate negative sentiment, Poilievre must proactively address criticism on divisive

topics like immigration and comparisons to populist leaders. A transparent and empathetic approach can help neutralize backlash and broaden his appeal.

- **Leverage Positive Media Platforms**

Capitalize on platforms like YouTube where positive sentiment is stronger. Invest in creating content that highlights his strengths, particularly his economic policies, to further reinforce support among key demographics.

- **Engage Neutral Audiences**

Target the majority neutral sentiment (74%) with campaigns that offer transparency and practical examples of policy impacts. Utilize town halls, Q&A sessions, and targeted digital content to build trust and convert neutral voters.

- **Monitor and Adapt Based on Sentiment Trends.** Use real-time feedback and regularly analyze public sentiment to identify emerging concerns or opportunities after certain events to refine messaging strategies and demonstrate responsiveness to public priorities.

STRATEGIES TO MANAGE CRITICISM ACROSS PLATFORMS

- **YouTube:** Create short, impactful videos that explain policies.
- **Twitter:** Address controversies swiftly to mitigate viral negativity.
- **Reddit:** Engage in long-form discussions to convert neutrals to supporters.
- **Facebook:** Share detailed posts with infographics and videos to explain policies and achievements
